GAS CHAIN SAWS

CHAIN SAW SELECTION GUIDE

Make wood cutting easier, quicker and simply more satisfying with a quality chain saw that will cut through the work in no time.

Does size matter?

- Consider what you need the saw for: a 16" guide bar can cut almost twice its length.
- You need power, but extra power adds weight. Consider the task and seek advice. Make it safe, make it easy.
- Check for safety features like an inertia chain brake, side chain tensioning and a chain catcher.
- Choose a well-balanced machine with a good power-to-weight ratio: light enough to handle with the power to do the job.
- Ease of use – Can you confidently start and operate the saw? Are controls accessible and simple to operate?

Visit your local STIHL Dealer for expert advice. They will guide you on the most appropriate saw for your needs and supply relevant safety clothing and accessories.

LIMITED TIME ONLY

How To Keep Your Hedges In Shape
To trim your hedges into an even, beautiful shape, you might want to use strings (or a measure laser) as guidelines. First you get rid of the "main offenders", large branches sticking out, then get down to the fine pruning. Hedge sides should be trimmed wider at the base to provide maximum light and sun for the exposed leaves. So, what has to go? If you're trimming it down for regrowth you can focus on long branches in the middle whereas if you're just "fine-tuning" you can concentrate on shape, evenness and thinning out. Start from the top and work your way downward. Also remember to fertilize the hedge to give it energy and to stimulate further growth.

A woman using a STIHL hedge trimmer to shape a hedge.

TRIMMING & PRUNING

STIHL's gas hedge trimmers are specially designed for comfort, balance and productivity in landscape gardening.
